

Whether your business is a small start-up with 5 employees or a growing multi-site organisation, we understand the need for reliable IT services that deliver real benefits and support your business aims.

With only a handful of employees, IT and technical issues can fall on staff and company directors. We can take away the burden of your IT, leaving you and your staff to focus on what you do best.

Whatever you need, the first thing we'll do is spend time understanding your business and the challenges you're looking to resolve. We will recommend and design tailored solution packages that deliver the desired results and ultimately transform business operations.

Throughout the process, you can be assured of a quality service, backed by our wide-ranging and extensive experience in SMEs. Most importantly, you will always be in the driving seat, making best informed decisions for your business.

Benefits of our services to SMEs

- Scalable solutions that grow with your business
- Free up staff for value adding work
- Improve business efficiency
- Independent advice for best informed decisions
- Extensive technical knowledge and support on hand at all times
- No risks during holidays or sick days
- One single supplier for all IT requirements

Cyber Security

SMEs are increasingly becoming the top target for cyber criminals. With the consequences of data breaches on small businesses now greater than ever, Cyber Security has never been so important. We can provide a full audit on your current systems and procedures, as well as implementation of the technology needed to safeguard your business.

Networks

Reliable internet access is essential for the day-to-day running of any SME. We can unravel the jargon and work with you to choose the network technology that's right for your business, without tying you into any lengthy contracts. Ultimately, we will give you complete peace of mind, ensuring that you can focus on running your business, while we take care of your networks.

Security

CCTV and Access Control Systems are becoming essential tools for any business premises. We have over 20 years' experience of CCTV and security technologies. Our team of specialists will design, install and support a bespoke solution to suit your exact requirements, using the most appropriate technology.

Telecoms

Technology is changing fast but the need for businesses to have effective traditional telephony remains paramount. Our consultative approach is built on 20 years' experience in telecoms solutions and means you will always be guided towards the technology that's right for your business.

IT & Technical Support

Resolving IT issues can take up valuable business time. We can free up your staff, leaving them to focus on what they do best, while we ensure that your IT and technology is delivering what your business needs. We take complete issue ownership and achieve effective resolution to problems, as quickly as possible.

Consultancy

Our business consultants are specialists in SMEs. You will benefit from their extensive experience, as they work with you to make your business processes more efficient and ensure that your business systems are delivering the maximum benefit. Our consultants will design a tailored solution package that's unique to your business and delivers the results that you want.

Cloud

With businesses now so reliant on IT systems, any failure or interruption is likely to be time consuming and costly to recover from. We can remove these risks from your business by introducing cloud technology. We will guide you through the options and provide you with a secure and cost-effective cloud solution to give you complete peace of mind.

Your RDS Global experience starts with us understanding you. Get in touch and tell us about your business requirements and the challenges you face.
